

MURO NATURALE

Must not be diluted before use.

Treatable after about 12-14 hours. Totally dry after 28 days.

Conservation: in a dry, cool place, away from the frost and humidity.

Step 1 - To start, apply Primer Naturale.

Step 2 - Prepare the shade with our paints indicated in the sample collection and mix with the beater; allow to rest for 24 hours.

Step 3 - Applied in just one coat, freely distribute the product with the trowel.

Step 4 - When the product begins to dry (15/20 minutes) smooth with our spatula, with the help of sprayed water.

Step 5 - When the product lightens demonstrating that it is almost dry, polish the surface with a glove PE6.

Step 6 - To get a stronger lucidity you can still pass our spatula for a dry polishing. If desired, give a protection with Savon d'Eau, Cera del Vecchio, Vetro Lucido or Opaco, according to the required breathability or resistance.
